100 Days of Coding - Day 6 (Completed)

10/8/2026

I built a robot that will complete a maze using Reeborg's World and python code. My code is below the screenshot of the maze.

```
def turn_right():
    turn_left()
    turn_left()
    turn_left()

while not at_goal():
    if right_is_clear():
        turn_right()
        move()
    elif front_is_clear():
        move()
    else:
        turn_left()
print("I'm done! That was fun.")
```
